

# SARA AL SULAIMANI

I am an interdisciplinary visual artist, who is influenced by memories, remembrance, and emotional documentation. Highly conceptual, my practices are meditative, and are a contextual representation of my narrative. I tend to explore the limits of medium and material, as I would explore my own recollections of people, places, and experiences. My ultimate vocation has been to embody how culture and heritage, together with eidetic individual recollection and reminiscence, play and shape my contemporary identity.
